RL-RZ

RACE LABEL RAZOR

Capabilities:

With the needs of Wineries and Breweries in mind- The Race Razor was designed for labeling Straight Cylindrical bottles and containers. The RL-RZ is extremely easy to operate &

can apply a single label or front and back labels that are alternating on the same roll. A unique feature of the Razor is that it will operate from roll stock in any core size and will also operate from flat stock, stacked fan-folded stock, or right out of a printer. This feature makes it the best label applicator for boutique wineries and distilleries doing small batches or short runs.
