

# RLTCW-SP

**Race Label Taper Capable WIDE FORMAT with Spring Plate**

**THIS IS OUR “TOP OF THE LINE” LABEL APPLICATION MACHINE. The Model RLTCW-SP is the Race Label Taper Capable with Spring Plate in WIDE FORMAT. The RLTC-SP with all its endless capabilities just got even better! The WIDE FORMAT allows you to apply labels to taller bottles and containers with labels up to 12½” in height. It will apply labels to- *Straight cylindrical, Tapered cylindrical, Bottles, Containers, Jars, tins, and tubs including Non-Cylindrical shapes like ovals, squares, soft-squares, flasks, and rectangles.* For example, honey bears, flat or oval containers, faceted bottles and jars, hexagon jam and jelly jars, salad dressing and condiment bottles and containers, tea tins, stand up pouches, pinch grip containers and F-stlye jugs. The Race Model RLTCW-SP is the #1 choice for most distilleries and any business with multiple product lines. The machine is fully adjustable therefore, you can document your settings if you need to go back and forth between projects. It is like having several machines all built into one that can handle almost any label application. If you have a unique taller Specialty bottle or container style with a taller label this is the machine for you!**
