CAPABILITIES:

The Race Label Red Cyclone is used for labeling Straight cylindrical bottles, containers & jars. This little gem is lightweight, portable, economical and easy to use! For companies with a multiple product line -the affordability factor makes having several of these machines very beneficial. Not only will this save time, you will increase your business's productivity and efficiency! This machine is available in **2 different modes.**

In **Mode I** the RL-RRC is equipped with a crank handle for labels that are streaming (connected to each other) from non-roll stock, fan folded flat stock or even looping directly out of a printer. **Please note** If the labels are not on a roll, they must be connected to each other.

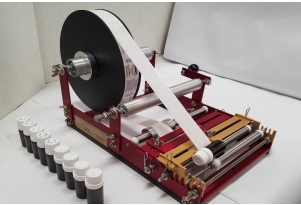

In **Mode II** the RL-RRC is configured without the crank handle. Generally labels are printed and wound onto a roll and to apply labels with this method the crank handle is not required.

The Race RL-RRC can be customized with the optional **Lip Balm/Small Vial Attachment** for very **small containers, vials & lip balms** that range from ½" up to 1½" in diameter.

Race Labeling Concepts encourages you to call in and discuss your labeling needs in detail.

Call 505-239-5847 or 800-653-9357 today!
